Subject Index

Abiotic factors, water pollution, metal toxicity, toxicity, amelioration, anaerobic bacterium eutrophication, 123

Absorption, *Limnanthemum,* chromium, cadmium, toxicity, 175

Amelioration, water pollution, metal toxicity, abiotic factors, toxicity, anaerobic bacterium eutrophication, 123

Anaerobic bacterium eutrophication, water pollution, metal toxicity, abiotic factors, toxicity, amelioration, 123

Anodic stripping voltammetry, speciation, toxicity, metals, bioavailability, 1

Antarctica, surface waters, chemical composition, trace metals, 289

Atmosphere, mercury, volatilization, emissions, flux, lakes, 47

Atomic absorption spectrophotometry, cadmium analysis, lead analysis, digestion procedures, 15

Background values, trace elements, Yangtze River, 391

Bioaccumulation, metals, freshwater, mussel, 85

Bioaccumulation, silver, bivalve, biodisponsibility, toxicity, physico-chemical forms of storage, 97

Bioavailability, saltmarsh, pollution, metal accumulation, 203

Bioavailability, sediments, heavy metals, speciation, 67

Bioavailability, speciation, toxicity, metals, anodic stripping voltammetry, 1

Biodisponsibility, silver, bivalve, bioaccumulation, toxicity, physico-chemical forms of storage, 97

Biota, zinc, sediments, water, Lake Burley Griffin, sources, management implications, 235

Bis-tributyltin, oysters, copper, growth, 193

Bivalve, silver, biodisponsibility, bioaccumulation, toxicity, physico-chemical forms of storage, 97

Cadmium, lead, sample, contamination, 405

Cadmium, *Limnanthemum,* chromium, absorption, toxicity, 175

Cadmium analysis, lead analysis, digestion procedures, atomic absorption spectrophotometry, 15

Chemical composition, Antarctica, surface waters, trace metals, 289

Chromium, *Limnanthemum,* cadmium, absorption, toxicity, 175

Coastal sediments, heavy metals, distribution mechanisms, Tokyo Bay, 373

Complexation capacity, humic acids, extraction, 25

Contamination, lead, cadmium, sample, 405

Copper, cyanide, fish assemblage response, 321

Copper, oysters, bis-tributyltin, growth, 193

Copper, *Zostera muelleri,* sentinel accumulation, 185

Copper assimilative capacity, copper species, dissolved organic compounds, copper bioaccumulation in oysters, ecological parameters, 359

Copper bioaccumulation in oysters, copper species, copper assimilative capacity, dissolved organic compounds, ecological parameters, 359

Copper species, copper assimilative capacity, dissolved organic compounds, copper bioaccumulation in oysters, ecological parameters, 359

Cyanide, copper, fish assemblage response, 321

Dating, sediments, heavy metals, estuary, 253

Dating, trace metals, sediments, lead-210, lakes, 227

Digestion procedures, cadmium analysis, lead analysis, atomic absorption spectrophotometry, 15

Dissolved organic compounds, copper species, copper assimilative capacity, copper bioaccumulation in oysters, ecological parameters, 359
Distribution mechanisms, heavy metals, coastal sediments, Tokyo Bay, 373

Ecological parameters, copper species, copper assimilative capacity, dissolved organic compounds, copper bioaccumulation in oysters, 359
Emissions, mercury, atmosphere, volatilization, flux, lakes, 47
Estuary, sediments, heavy metals, dating, 253
Extracation, tributyltin absorption, salinity, 39
Extraction, humic acids, complexation capacity, 25

Fish, heavy metals, *Lates calcarifer,* matrix modification, 305
Fish, oxygen bomb, total mercury, 33
Fish assemblage response, copper, cyanide, 321
Flux, mercury, atmosphere, volatilization, emissions, lakes, 47
Freshwater, bioaccumulation, metals, mussel, 85

Growth, oysters, bis-tributyltin, copper, 193

Heavy metals, coastal sediments, distribution mechanisms, Tokyo Bay, 373
Heavy metals, fish, *Lates calcarifer,* matrix modification, 305
Heavy metals, marine sediments, speciation, Red Sea, 417
Heavy metals, sediments, bioavailability, speciation, 67
Heavy metals, sediments, estuary, dating, 253
Humic acids, extraction, complexation capacity, 25
Hydra, uranium, toxicity, pH, 159

Lake Burley Griffin, zinc, sediments, water, biota, sources, management implications, 235
Lakes, mercury, atmosphere, volatilization, emissions, flux, 47
Lakes, trace metals, sediments, lead-210, dating, 227
Larval fish, uranium, toxicity, no-observed-effect-concentration (NOEC), tropical Australia, 137
Lates calcarifer, heavy metals, fish, matrix modification, 305
Lead, cadmium, sample, contamination, 405
Lead analysis, cadmium analysis, digestion procedures, atomic absorption spectrophotometry, 15
Lead-210, trace metals, sediments, dating, lakes, 227
Limnanthemum, chromium, cadmium, absorption, toxicity, 175

Management implications, zinc, sediments, water, biota, Lake Burley Griffin, sources, 235
Marine sediments, heavy metals, speciation, Red Sea, 417
Matrix modification, heavy metals, fish, *Lates calcarifer,* 305
Mercury, atmosphere, volatilization, emissions, flux, lakes, 47
Metal accumulation, saltmarsh, pollution, bioavailability, 203
Metal toxicity, water pollution, abiotic factors, toxicity, amelioration, anaerobic bacterium eutrophication, 123
Metals, bioaccumulation, freshwater, mussel, 85
Metals, speciation, toxicity, bioavailability, anodic stripping voltammetry, 1
Mussel, bioaccumulation, metals, freshwater, 85
Mussels, sewage, trace metals, scope for growth (SFG) measurements, 263

Natural waters, trace metals, sediment speciation, sediment quality, Philippine sediments, 345
No-observed-effect-concentration (NOEC), uranium, larval fish, toxicity, tropical Australia, 137

Oxygen bomb, total mercury, fish, 33
Oysters, bis-tributyltin, copper, growth, 193

pH, *Hydra,* uranium, toxicity, 159
Philippine sediments, trace metals, sediment speciation, sediment quality, natural waters, 345
Physico-chemical forms of storage, silver, bivalve, biodisponsibility, bioaccumulation, toxicity, 97
Pollution, saltmarsh, metal accumulation, bioavailability, 203

Red Sea, heavy metals, marine sediments, speciation, 417

Salinity, tributyltin absorption, extracation, 39
Saltmarsh, pollution, metal accumulation, bioavailability, 203
Sample, lead, cadmium, contamination, 405
Scope for growth (SFG) measurements, mussels, sewage, trace metals, 263
Sediment quality, trace metals, sediment speciation, natural waters, Philippine sediments, 345
Sediment speciation, trace metals, sediment quality, natural waters, Philippine sediments, 345
Sediments, heavy metals, bioavailability, speciation, 67
Sediments, heavy metals, estuary, dating, 253
Sediments, trace metals, lead-210, dating, lakes, 227
Sediments, zinc, water, biota, Lake Burley Griffin, sources, management implications, 235
Sentinel accumulation, *Zostera muelleri,* copper, 185
Sewage, mussels, trace metals, scope for growth (SFG) measurements, 263
Silver, bivalve, biodisponsibility, bioaccumulation, toxicity, physico-chemical forms of storage, 97
Sources, zinc, sediments, water, biota, Lake Burley Griffin, management implications, 235
Speciation, heavy metals, marine sediments, Red Sea, 417
Speciation, sediments, heavy metals, bioavailability, 67
Speciation, toxicity, metals, bioavailability, anodic stripping voltammetry, 1
Surface waters, Antarctica, chemical composition, trace metals, 289

Tokyo Bay, heavy metals, coastal sediments, distribution mechanisms, 373
Total mercury, oxygen bomb, fish, 33
Toxicity, *Hydra,* uranium, pH, 159
Toxicity, *Limnanthemum,* chromium, cadmium, absorption, 175
Toxicity, silver, bivalve, biodisponsibility, bioaccumulation, physico-chemical forms of storage, 97
Toxicity, speciation, metals, bioavailability, anodic stripping voltammetry, 1
Toxicity, uranium, larval fish, no-observed-effect-concentration (NOEC), tropical Australia, 137
Toxicity, water pollution, metal toxicity, abiotic factors, amelioration, anaerobic bacterium eutrophication, 123
Trace elements, background values, Yangtze River, 391
Trace metals, Antarctica, surface waters, chemical composition, 289
Trace metals, mussels, sewage, scope for growth (SFG) measurements, 263
Trace metals, sediment speciation, sediment quality, natural waters, Philippine sediments, 345
Trace metals, sediments, lead-210, dating, lakes, 227
Tributyltin absorption, extracation, salinity, 39
Tropical Australia, uranium, larval fish, toxicity, no-observed-effect-concentration (NOEC), 137

Uranium, *Hydra,* toxicity, pH, 159
Uranium, larval fish, toxicity, no-observed-effect-concentration (NOEC), tropical Australia, 137

Volatilization, mercury, atmosphere, emissions, flux, lakes, 47

Water, zinc, sediments, biota, Lake Burley Griffin, sources, management implications, 235
Water pollution, metal toxicity, abiotic factors, toxicity, amelioration, anaerobic bacterium eutrophication, 123

Yangtze River, trace elements, background values, 391

Zinc, sediments, water, biota, Lake Burley Griffin, sources, management implications, 235
Zostera muelleri, sentinel accumulation, copper, 185
